THE DIGITAL FINANCE ECOSYSTEM

The Digital Finance Ecosystem

is the first course in CPA Australia's

Digital Finance suite.

This course provides in-depth practical

content including interactive activities,

knowledge checks

and short videos designed to enhance and

embed learning in this new and

innovative area of finance.

The 20-hour course is divided into

topics and subtopics with easy navigation.

Each page features a range of images and

interactions to visually explain the content

and keep you engaged. Along with the

necessary theory

there are an abundance of practical

examples of real businesses using these

new technologies.

Each course contains a number of short videos.

Animations are used to explain the

content simply and visually.

Expert speaker videos feature senior

level subject matter experts

explaining how these new technologies

are used in practice across a range of industries.

Progressive activities throughout the

course help you test and embed your knowledge,

for immediate application in the

workplace. Each topic contains a

practical business scenario

that allows you to provide advice to the

CEO, or other simulated business roles, to

practice applying what you've just learnt.

For accessibility purposes, you can

download a full-colour PDF of the course

from the final page. When you finish the

course, you can return to the LMS,

or learning management system, to take

the end-of-course survey.

We value your feedback and use this for

continuous improvement.

Once you have studied all 20 hours of

the course, proceed to your assessment.

Read the assessment security policy and

navigation instructions carefully.

You will need to have a webcam, test your

device and show government issued ID

before you can begin. The assessment is

one hour and open book,

with 20 targeted questions to test all

components of the course.

You must score at least 60 percent to pass.

You will need to demonstrate a high

level of competency in your assessment.

This course is designed to be at tertiary

level and the assessment is an

accurate representation of the knowledge

and skills required.

Good luck!
